

Home Inspection Holiday Checklist

- Do not overload the receptacles due to a large number of cooking appliances (Crockpots, Air Fryers, Instant Pots, etc.)
- Have your fireplace properly inspected and cleaned before the first use of the season.
- Pay attention to any candles you have burning. Don't leave them unattended.
- Be careful what you dump down the sink drain. Excessive grease and other items may clog the drains.
Check all your smoke alarms and carbon monoxide detectors. There are a lot of potential fire and carbon monoxide hazards during the holiday. Especially with a large number of people sleeping in your home.
- Change your furnace filter
- Have a snow shovel and icemelt on hand for the sidewalks and driveways
